Professional Summary

Accomplished Mobile Developer with end-to-end expertise in native Android (Java/Kotlin) and cross-platform React Native. Spearheaded a core Android app delivering under 2-second load times for hundreds of daily users. In React Native, implemented an automated CI/CD pipeline with GitHub Actions & Fastlane—enabling weekly feature releases and ensuring uninterrupted uptime. Streamlined app bundle size to accelerate installs and startup performance. Skilled in Expo, TypeScript, Supabase & Firebase integrations, REST/GraphQL APIs, offline-first architectures, and comprehensive Jest/Detox test suites. Passionate about building scalable, high-performance mobile experiences that drive user engagement and business growth.

Core Skills & Technologies

- **Mobile & Frameworks:** React Native, Expo, Native Android (Java/Kotlin)
- **State & Navigation:** Context API, React Navigation
- **Backend & APIs:** NestJS, Node.js, Supabase, Firebase, REST
- **Databases & Data Stores:** MongoDB, SQLite
- **Languages:** JavaScript (ES6+), TypeScript, Kotlin.
- **Cloud & DevOps:** AWS EC2, S3 Bucket, GitHub Actions, Fastlane, firewall & server ops

Professional Experience

- Full Stack Developer (Android)
 - Truspirit Finserve Consultant Pvt. Ltd., Vasai
 - Nov 2024 – May 2025
 - Architected and launched the “Truspirit” agent-onboarding mobile app (React Native & Supabase), cutting average onboarding time by 30% and supporting 1,000+ agents.

- • Developed customer-facing loan-application boosting web-to-loan conversion by 18%.
- Developed internal HR operations applications in React Native—such as an ID Card Generator and Offer Letter Generator—streamlining document creation and delivery.
- • Managed infrastructure and security tasks (firewall configuration, server maintenance), achieving 99.9% uptime and automated CI/CD pipelines via GitHub Actions & Fastlane.

Selected Projects

- Hotel Sealand POS System (Free -Lancing)
 - Designed and implemented a comprehensive point-of-sale mobile application (React Native, Expo, Supabase) for hotel operations, encompassing menu management, order processing, billing, inventory control, and room management.
 - Engineered real-time data synchronization via Supabase, ensuring instant updates to menus, orders, billing, inventory, and room status across all devices and terminals.
 - Delivered to client and maintained the live application in production, leveraging Jest and Detox test suites to uphold reliability and performance under peak usage.

Education

- Diploma in Computer Engineering, Pravin Rohidas Patil College of Diploma & Engineering, Maharashtra, Aug 2021
- B.A. (General), Annasaheb Vartak College, Vasai, Jun 2022

Certifications

- React Native Development – Cursa
- Node.js Development – Cursa
- AWS Fundamentals – Self-Study
